Education

Bachelor of Technology in Computer Science and Engineering 2021 - 2025
JAIN (Deemed-to-be-University) Bangalore, Karnataka

Experience

Full Stack Developer Intern *Aivariant* Jun 2026 - Sep 2026

- Developed full-stack web application features using Java, Spring, Spring Boot, REST APIs, React.js, JavaScript, HTML, and CSS.
- Integrated frontend components with backend REST APIs and databases, and contributed to debugging, testing, and end-to-end application workflows.

Skills

Programming Languages: Java, JavaScript, SQL, Python

Backend: Spring Boot, Spring, REST APIs, Spring Security, JWT Authentication, JPA/Hibernate

Frontend: React.js, HTML, CSS, Tailwind CSS, Axios, React Router

Databases: MySQL, PostgreSQL, SQL, MongoDB

Testing & Automation: JUnit, Mockito, Selenium WebDriver, PyTest, Page Object Model

Tools & DevOps: Git, GitHub, Docker, Docker Compose, GitHub Actions, Maven, Swagger

Core Competencies: Full-Stack Development, Debugging, Problem Solving, SDLC, Agile, Requirement Analysis

Projects

CampusCart - Full-Stack E-Commerce Platform

- Built a microservices e-commerce platform with separate Auth, Product, and Order services using Java, Spring Boot, and React.js.
- Implemented Spring Security, BCrypt password hashing, JWT authentication, protected REST APIs, validation, and authorization.
- Developed product CRUD, search/filtering, pagination, inventory, reviews/ratings, cart, checkout, orders, and cancellation with stock compensation.
- Integrated MySQL and MongoDB, containerized services with Docker Compose, and added backend tests plus frontend lint/build checks.

Authentic Food Recipe Website *Culinary Knowledge Sharing Platform*

- Built a website for users to share and explore authentic recipes, with community ratings and search features.
- Technologies: HTML, CSS, JavaScript, MongoDB

Publications

Enhancing Eye Disease Classification Accuracy Through EfficientNetB5 01/12/2024
IEEE ICCRTEE 2025
Achieved a 7% improvement over baseline models using transfer learning.

Deep Learning Approach for Facial Expression Recognition 01/12/2024
IEEE ICCRTEE 2025
Improved emotion classification accuracy using CNN-based architectures.

ACHIEVEMENTS & INTERESTS

- Interests: Sprinting, Basketball, Jogging, Fitness
- Presented research at international conference in 2025
